SHUHAIMIYA TRADING & SERVICES

GRAPHIC DESIGN | MOTION GRAPHICS | SOCIAL MEDIA MARKETING | PRINTING SERVICES

VISION

To achieve sustainable & consistent growth, Shuhaimiya Printers has drawn a structure which drives many aspects of our business and sets the bar in terms of what we need to achieve.

The Workplace: Work greatly in a great place

Our Customers: To be seen as the 'Preferred Partner' for printing needs.

Our Partners: Create relationships & networks with mutual respect for mutual benefit.

Internally: Dynamic, efficient and responsive

MISSION

Our mission is to surpass our client's expectations on every project with superior quality, service and value. We treat every customer with sincerity, fairness and professionalism while delivering a quality product in a timely manner.

Our goal is to provide our clients with the highest quality printing, duplicating and graphic design services available today, in the fastest, most economical way possible. In doing so, we will create long-lasting, mutually beneficial relationships.

We personally guarantee your complete satisfaction with all of the products we sell, and services we provide. We stand behind the quality of every job that is produced in our company.

DIGITAL PRINTINGS

Digital printing doesn't use plates the way offset does, but instead uses options such as toner (like in laser printers) or larger printers that do use liquid ink. Digital printing shines when lower quantities are needed; think of a run of 20 greeting cards or 100 flyers. Another benefit of digital printing is its variable data capability. When each piece needs a unique code, name or address, digital is the only way to go. Offset printing cannot accommodate this need. Learn more about digital printing options and capabilities.

While offset printing is a fantastic way to produce great-looking print projects, many businesses or individuals do not need large runs of 500 or more, and the best solution is digital printing.

Digital | Sign Boards | Banners | Rollups | Stickers

OFFSET PRINTINGS

Offset printing technology uses plates, usually made from aluminum, which are used to transfer an image onto a rubber "blanket", and then rolling that image onto a sheet of paper. It's called offset because the ink is not transferred directly onto the paper. Offset printing is the best choice when larger quantities are needed, and provides accurate color reproduction, and crisp, clean professional looking printing.
