GREEN ROOF SYSTEM

Chinar Group care energy conversation promote Rooftop gardens considering as an eco-friendly alternative to cooling the home or building because the shade offered by plants reduces heat flow and increases precipitation, resulting in cooler temperatures and improved air quality.

GREENWALL SYSTEM

We are setting trends of GREEN living for indoors by adding living green wall technology in architectural designs. The presence of green walls in buildings changes the microenvironment indoors, bringing plenty of health and environmental benefits for end users.

Roads and building materials absorb solar radiation and re-radiate it in and around the building space. The construction of live green walls reduces the temperature and energy consumption, absorbs toxicity, and provides a clean indoor environment.

ARTIFICIAL TURF

Chinar group propose an alternative where water constraints and maintenance is challenging for landscape, , Artificial Plants and Grass is used to enhance the aesthetic value of the living tapestries, there are numerous environmental benefits, such as conserving water, decreasing carbon emissions, and eliminating the need for harmful chemicals.

WATER FEATURE

We excel in crafting enchanting water features that infuse spaces with a heightened sense of serenity and elegance. A water feature is a distinctive and vibrant addition to any environment, offering the soothing melodies of flowing water and the captivating beauty of cascading fountains, ponds, or waterfalls.

AGRICULTURAL FARM BUILDING & MANAGEMENT

We provide consultation and construction for building and managing Agricultural farms for plant cultivation, production & harvesting, and maintenance.

QUALITY

STATEMENT

We adopt a check & balance process for understanding, evaluating, defining, and managing expectations so that customer requirements are met. The yardsticks are developed to carry out the variances against the standard or customer requirements.

QUALITY CONTROL

We believe in prevention over correction; hence we follow the requirements & checklist for every phase of the project for to ensure that customer requirements are met and process is being followed. Every phase exit is being followed by the Back check process to ensure that all requirements and milestones are achieved

QAULTY ASSURANCE

We believe that the result obtained by the application of check list devised in the quality control process are taken up seriously to ensure that required standards are being implemented and results are in lined accordingly.

QUALITY
IS THE BEST
BUSINESS
PLAN

QUALITY, HEALTH, SAFETY & ENVIRONMENT PLAN

CHINAR is highly conscious to follow and implement the QHSE requirements of customer, local & international authorities standards. This is to ensure the safe operations on work place with minimum environmental degradation.

Our HSE team is responsible to develop & implement the QHSE plan for smooth, environmental friendly & human safety operations at site.
